SPECIAL SEMINAR

FRIDAY 20 MARCH 2015 AT 8:00 AM
AUDITORIUM, CENTRAL BUILDING, QIMR BERGHOFER

Expanding therapeutic options in advanced prostate cancer

Associate Professor David Quinn
Medical Director, Norris Cancer Hospital and Clinics
USC Norris Comprehensive Cancer Center, USA

Hosted by Professor Geoff Hill, Bone Marrow Transplantation,
QIMR Berghofer and Research Director, Cancer Care Services,
RBWH

Associate Professor David Quinn undertook his early training at St. Vincent’s Hospital in Sydney before completing a PhD in Cancer Biology at the Garvan Institute and moving to the United States in 2000. He is currently the Medical Director of the Norris Cancer Hospital and Clinics, Head, Genitourinary Medical Oncology and Associate Professor of Medicine in the Division of Medical Oncology, Keck School of Medicine, University of Southern California. Prior experience includes Directorship of the Clinical Investigation Support Office and Leadership of the Genitourinary Cancer and Developmental Therapeutics Programs for the USC Norris Comprehensive Cancer Center.

Associate Professor Quinn is a medical oncologist and an international expert in the field of clinical trials and molecular correlative studies in genitourinary cancer and early therapeutics. He has published more than 100 papers, reviews and chapters including recent publications in New England Journal of Medicine, Lancet Oncology, Journal of the National Cancer Institute, Cell Stem Cells and Journal of Clinical Oncology.

Associate Professor Quinn’s visit is sponsored by

A light breakfast will be available from 7.30am. For catering purposes, please RSVP to Nienke Zomerdijk at nienke.zomerdijk@health.qld.gov.au
